

A21

11. (Amended) A device [Device] for voice recognition, comprising: [a)
in which]
a voice recognition system; and [is provided, b) in which]
means [are provided] for adjusting an accuracy of the voice recognition system,
5 said means being so arranged that system parameters of the voice
recognition system are adjustable, said system parameters being
computable using an input quantity.

10 The foregoing amendments to the specification and claims under Article
41 of the Patent Cooperation Treaty place the application into a form for
prosecution before the U.S. Patent and Trademark Office under 35 U.S.C. §371.
Accordingly, entry of these amendments before examination on the merits is
15 hereby requested.

Respectfully submitted,

Melvin A. Robinson (reg. no. 31,870)
